ByCut Eco 3015

No-nonsense laser cutting

The appealing laser cutting system for successful sheet metal processing: robust, with Swiss expertise, and at an attractive price – for beginners as well as for experienced users.

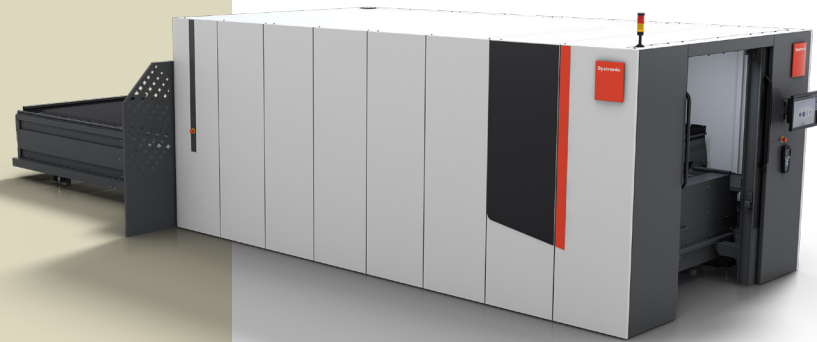

Laser cutting made very simple

When you need a top-quality laser cutting system with an attractive price-performance ratio: The ByCut Eco 3015 is designed for user-friendliness and functionality. This enables you to make a smart start in fiber laser cutting with complete ease.

As versatile as you are

In addition to steel and aluminum sheet metal, process non-ferrous metal with excellent quality as well. The ByCut Eco 3015 offers outstanding cutting performance for a broad production range at an advantageous price – for more profit per part.

Clever software

The ByCut Eco 3015 uses BySoft Cell Control Cut for programming as well as nesting on the machine. This intelligent software offers you support in every way when creating cutting plans and setting parameters. Operate your ByCut Eco 3015 on a 21.5-inch touch screen as easily as your smartphone.

Bystronic automation: Let work happen

With the possibility of automation for your production, you further increase efficiency. Your employees take care of more important tasks, while Bystronic automation takes over loading and unloading the laser cutter or storing sheet metal and parts.
