ByLoader Flex – your first step into automated production

The ByLoader Flex is the ideal automation system for your Bystronic laser cutting machine. Leave the loading and unloading process to it and take care of more important tasks. The ease of use as well as the advantageous price are the plus points of the ByLoader Flex.

Minimal effort, immediate result

The quick and easy installation of the ByLoader Flex on your laser cutting machine ensures minimal downtime in your production. Once installed, the ByLoader Flex ensures high efficiency and gives your production an extra boost.

One automation system for two systems

Do you have more than one laser cutting systems? The “2 for 1 principle” of the ByLoader Flex is unique: a single automation system operates two laser cutters. With one ByLoader Flex, you can manage two laser machines at the same time.

Safety is a top priority

The safety of your employees at the machine is also our top priority! With the ByLoader Flex, you are indeed on the safe side: simple management in an absolutely safe environment that reduces the risk to the operator is guaranteed.

Flexible workflows possibility

The reachability of the laser shuttle table guarantees an easy access for its maintenance and different material handling possibility: manually, with your forklift, and with overhead cranes if required.
